DETAILED ACTION

This office action is in response to applicant's communication filed on 8/23/05.

Claim 1 is pending in this application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is nothing in the specification that reads on the negative limitation of the claim as claimed now, thus raising new matter situation.

Claim Rejections - 35 USC § 103

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al.

Instant claim is directed to a method for producing an amide comprising combining a thio acid and an organic azide in the presence of a solvent, so that an amide is produced.

Chu et al is teaching a method for producing an amide comprising combining a thio acid and an organic azide. The difference between the reference and herein claimed method is that the reference does not use a solvent.

However, it would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use the a solvent, because selection of a solvent and its ration with respect to the reactants were well within the ordinary skill in the art and one of ordinary skill in the art would have optimized the same with the reasonable expectation of achieving a successful amide, absent evidence to the contrary. In re Dunn 146 USPQ 479. Applicants have not shown unexpected results.

Applicant's arguments and affidavits were considered and accordingly, Fazzio reference is withdrawn. However, applicants need to show unexpected results due to the solvent versus Chu et al reference.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
